[Corporate Standard | GHG Protocol](#)

Corporate Value Chain (Scope 3) Standard | GHG Protocol

Vistavis Limited ("Vistavis") recognises the urgent need to address climate change and its associated risks. We are committed to minimising our environmental impact, as well as working with partners across our supply chain and customer base to deliver their targets. All of this is aimed at contributing to global efforts to limit warming to 1.5°C, as outlined in the IPCC's AR6 report and the COP26 agreement. This commitment aligns with the UK government's Net Zero target, which mandates a significant reduction in greenhouse gas (GHG) emissions by 2050.

This Carbon Reduction Plan (CRP) provides a comprehensive overview of Vistavis's approach to measuring, managing, and reducing its carbon footprint. It outlines our baseline emissions, establishes clear reporting boundaries, defines ambitious reduction targets, and details the specific initiatives we will implement to achieve these targets. This plan has been developed in accordance with Procurement Policy Note (PPN) 06/21, associated guidance, and relevant reporting standards. Our plan is reviewed regularly to assess the evolving opportunities to meet our targets.

Vistavis is a specialist provider of commercial cleaning, flooring, and building services. Our operations primarily involve offering comprehensive service solutions for the modern workplace to clients across the United Kingdom. Our services span various sectors, including private sector (including healthcare), public sector, government, education, logistics, technology, leisure, real estate, and retail. Vistavis is proud to be certified to ISO 9001 (Quality Management) and ISO 14001 (Environmental Management), and also holds accreditations through SafeContractor and CHAS, demonstrating our commitment to excellence, environmental stewardship, and operational best practices across all our services. We operate nationally across the UK to deliver on-site support for all specialist subcontracted cleaning, flooring, and building service requirements.

Our main site of operation, which forms the basis of this report, is based near London Gatwick Airport, supporting our national coverage.

The core purpose of this Carbon Reduction Plan is to:

- Establish a baseline: Quantify Vistavis's current GHG emissions across relevant scopes to provide a reference point for measuring future progress.
- Define reporting boundaries: Clearly delineate the organisational and geographical boundaries for emissions reporting, ensuring a comprehensive and transparent approach.
- Set reduction targets: Commit to specific, measurable, achievable, relevant, and time-bound (SMART) targets for reducing GHG emissions, aligned with climate science and the UK's Net Zero target.
- Outline reduction initiatives: Identify and describe the concrete actions and projects that Vistavis will undertake to achieve its emission reduction targets.
- Ensure compliance: Adhere to the requirements of PPN 06/21 and other relevant UK regulations and reporting standards.

- Promote transparency: Communicate Vistavis's carbon reduction efforts to stakeholders, including customers, employees, suppliers, and the public.
- Drive continuous improvement: Establish a framework for ongoing monitoring, reporting, and review of our carbon reduction performance, enabling us to adapt and improve our strategy over time.

Vistavis acknowledges that its operations contribute to GHG emissions, primarily through energy consumption in our facilities, business travel, employee commuting, and the activities of our supply chain. We are committed to taking responsibility for these emissions and implementing effective measures to mitigate our impact.

This plan, alongside our certifications such as **ISO 14001 (Environmental Management)**, **ISO 9001 (Quality Management)**, **SafeContractor**, and **CHAS**, demonstrates our dedication to environmental stewardship and our proactive approach to addressing climate change. By implementing the initiatives outlined in this CRP, Vistavis aims to minimise its carbon footprint, enhance its operational efficiency, and contribute to a more sustainable future.

This plan will be reviewed and updated annually to reflect our progress, incorporate new data, and align with evolving best practices and regulatory requirements.

Geographical Boundaries

West Sussex: Headquarters

Vistavis Limited
11-2 Borers Yard
Borers Arms Road
Copthorne
Crawley
West Sussex
RH10 3LH

GHG Inventory Reporting

This Carbon Reduction Plan covers the following sites within Vistavis's operational control:

Site	Estate Size (m ²)	% of Total Estate Size	Description	Tenure	Included in this Report
West Sussex Vistavis Limited 11-2 Borers Yard Borers Arms Road Copthorne Crawley West Sussex RH10 3LH	104 sq metres	100%	Base Operations	Leased	Yes
Total Applicable Estate Size	104 sq metres	100%			
Total Estate Size (including out of scope)	104	100%			
Number of Sites	1				

Scope of Works

Vistavis has established its geographical boundaries for greenhouse gas (GHG) emissions reporting based on the locations of its operational sites and the areas where its services are delivered within the United Kingdom. This ensures that the emissions inventory accurately reflects the organisation's carbon footprint within the nation where it conducts its primary business activities.

The geographical boundaries for emissions reporting encompass the following locations and operational areas:

- **Headquarters and Operations Hub:** Vistavis's central administrative and operational control centre is located near London Gatwick Airport. Emissions associated with the activities at this location, including energy consumption, waste generation, water usage, and employee commuting, are included within the reporting boundary.
- **Nationwide Client Sites:** Vistavis provides specialist commercial cleaning, flooring, and building services to numerous clients across various sectors throughout the United Kingdom. While the precise addresses of all client sites are extensive, the geographical boundary includes the emissions associated with Vistavis's service delivery activities (e.g., travel of technicians and project managers) to these locations throughout England, Scotland, Wales, and Northern Ireland.
- **National Service Network:** Vistavis operates with national coverage to provide on-site support. The geographical boundary includes the emissions generated by the travel and activities of its employees and technicians as they service clients throughout the UK.

By defining these geographical boundaries, Vistavis ensures a comprehensive and transparent approach to emissions reporting within its United Kingdom operations. This approach aligns with standard GHG accounting principles, enabling the organisation to effectively measure, monitor, and manage its environmental impact within the areas where it conducts business and delivers services across the UK.

This Carbon Reduction Plan provides an overview of Vistavis Limited's carbon emissions.

- **Baseline Period:** 1st Jan 2024 to 31st Dec 2024
- **Reporting Period:** 1st Jan 2024 to 31st Dec 2024

Commitment to Achieving Net Zero by 2050

Vistavis Limited is committed to achieving Net Zero emissions by 2050, aligning with the UK government's Net Zero target and the global effort to limit warming to 1.5°C as outlined in the IPCC's AR6 report and the COP26 agreement. We recognise the urgent need to reduce greenhouse gas emissions and are taking action to minimise our environmental impact. This Carbon Reduction Plan outlines our strategy and progress towards achieving this goal.

Descriptive information

Inventory Details	Scope of Reporting
Company name	Vistavis Limited
Description of the company	standard and bespoke solutions for commercial cleaning, flooring, and building services
Chosen consolidation approach (equity share, operational control or financial control)	Operational & Financial control
Description of the businesses and operations included in the company's organisational boundary	West Sussex: Headquarters Vistavis Limited 11-2 Borers Yard, Borers Arms Road, Copthorne, Crawley, West Sussex RH10 3LH
Reporting period covered	1st Jan 2024 to 31st Dec 2024
List of Scope 3 activities included in the report	Water/Wastewater, Business travel, Employee Commute, Air travel, Homeworking, Hotel Stay
List of Scope 1, Scope 2, and Scope 3 activities excluded from the report with justification for their exclusion	Scope 3 – Upstream & Downstream Transportation & Distribution as these do not fall in our current activities.
The year chosen as base year and rationale for choosing the base year ¹	1st Jan 2024 to 31st Dec 2024

¹ If a company has different base years for different scopes, base year information should be provided separately for each scope. Establishing a base year is required for scope 1 and 2 emissions, and required for scope 3 emissions when companies choose to track performance or set a reduction target.

Description of methodologies and data used

Scope	Methodologies used to calculate or measure emissions, providing a reference or link to any calculation tools used
Scope 1	N/A
Scope 2	Purchased Electricity & Gas Monthly bills kWh

Scope and category	Description of the types and sources of data used to calculate emissions	Description of the data quality of reported emissions	Description of the methodologies, allocation methods, and assumptions used to calculate emissions
Upstream scope 3 emissions			
Category 1: Purchased goods and services	N/A	N/A	N/A
Category 2: Capital goods	N/A	N/A	N/A
Category 3: Fuel- and energy-related activities (not included in scope 1 or scope 2) Water & Wastewater	Rented Premises	Monthly bills	m ³
Category 4: Upstream transportation and distribution	N/A	N/A	N/A
Category 5: Waste generated in operations	Rented premises	Average from Cambridge study	Assumption that collected container weight (1100 litres) is 87.8kg (from Cambridge study)
Category 6: Business travel	Appointments	Journey refunds	Refund slips
Category 7: Employee commuting	Attendance	Journey records	In miles from various modes of commute
Category 8: Upstream leased assets	N/A	N/A	N/A

GHG emissions data

- **Baseline Period:** 1st Jan 2024 to 31st Dec 2024
- **Reporting Period:** 1st Jan 2024 to 31st Dec 2024

		Baseline 01 Jan - 31 Dec 2024
Scopes and categories		Tons CO ₂ e
Scope 1: Direct emissions from owned/controlled operations		0
Scope 2: Indirect emissions from the use of purchased electricity		0.17
Scope 2: Indirect emissions from the use of purchased Gas		1.26
Scope 3: Emissions		
Category 1: Purchased goods and services		0
Category 2: Capital goods		0
Category 3: Fuel- and energy-related activities (not included in scope 1 or scope 2) Water & Wastewater		0.01
Category 4: Upstream t&d		0
Category 5: Waste generated in operations		0.19
Category 6: Business travel - Land		43.15
Category 6: Hotel Stay		0.33
Category 7: Employee commuting		2.17
Category 7: Work From Home		0.006
Category 8: Upstream Leased Assets - Vehicles		0
Category 9: Downstream t&d		0
Scopes		
Scope 1		0
Scope 2		1.43
Scope 3		45.85
Total Emissions		47.28

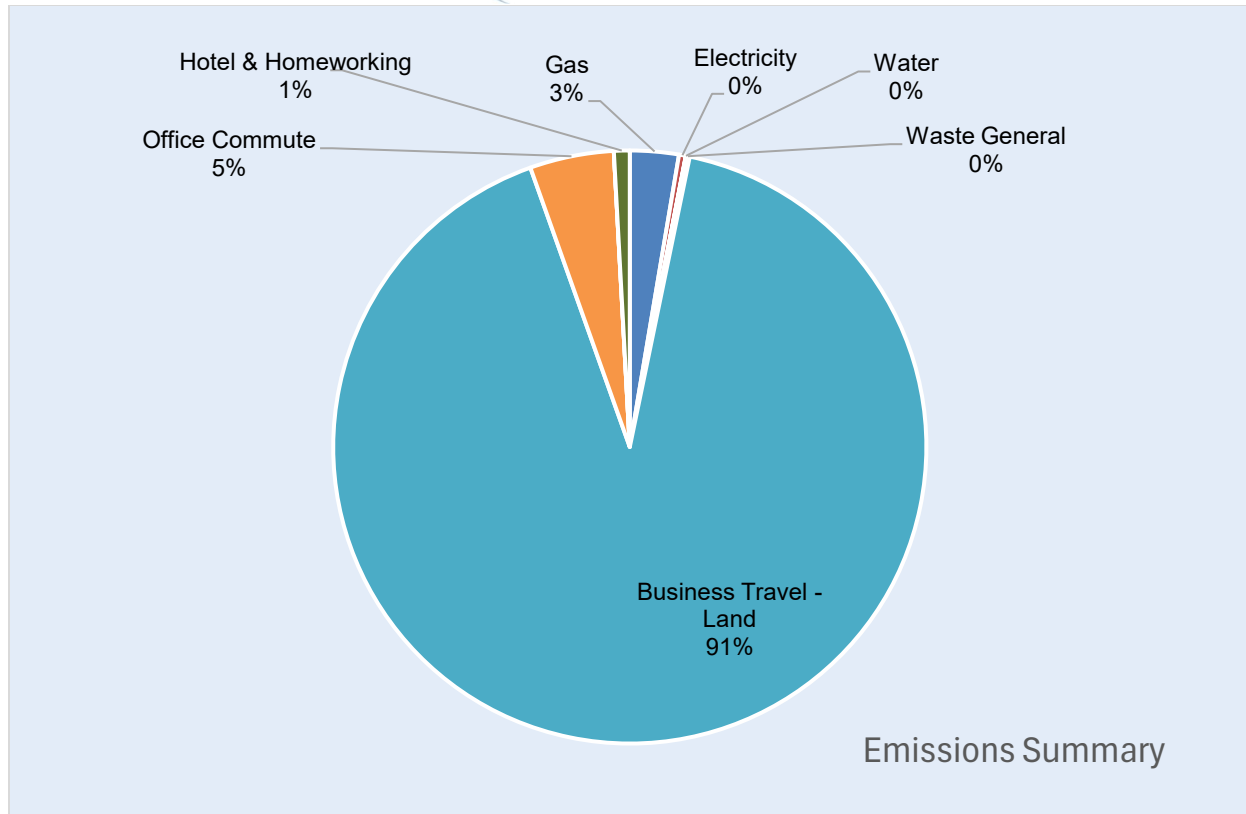

Figure 1

Analysis of Emissions

- **Baseline Period:** 1st Jan 2024 to 31st Dec 2024
- **Reporting Period:** 1st Jan 2024 to 31st Dec 2024

This section provides a comprehensive overview of Vistavis Limited's greenhouse gas (GHG) emissions for the reporting period of **1st January 2024 to 31st December 2024**, using the same period as our baseline. The data reflects the emissions generated from our operational activities and establishes our current carbon footprint, highlighting areas for future focus in our reduction efforts.

A summary of Vistavis's emissions for the Reporting Period (1st January 2024 - 31st December 2024):

- **Scope 1 Emissions (Direct Emissions):**
 - **0 tCO₂e**
 - No direct emissions from owned or controlled sources were recorded during this period.

- **Scope 2 Emissions (Indirect Emissions from Purchased Electricity and Gas):**
 - **1.43 tCO₂e** (comprising **0.17 tCO₂e** from purchased electricity and **1.26 tCO₂e** from purchased gas).
- **Scope 3 Emissions (Other Indirect Emissions):**
 - **45.85 tCO₂e**
 - The breakdown by category is as follows:
 - **Category 1: Purchased goods and services:** 0 tCO₂e
 - **Category 2: Capital goods:** 0 tCO₂e
 - **Category 3: Fuel- and energy-related activities (Water & Wastewater):** 0.01 tCO₂e
 - **Category 4: Upstream T&D:** 0 tCO₂e
 - **Category 5: Waste generated in operations:** 0.19 tCO₂e
 - **Category 6: Business travel - Land:** 43.15 tCO₂e
 - **Category 6: Hotel Stay:** 0.33 tCO₂e
 - **Category 7: Employee commuting:** 2.17 tCO₂e
 - **Category 7: Work From Home:** 0.006 tCO₂e
 - **Category 8: Upstream Leased Assets - Vehicles:** 0 tCO₂e
 - **Category 9: Downstream T&D:** 0 tCO₂e
- **Total Emissions:**
 - **47.28 tCO₂e**

Observations:

The data provides a clear snapshot of our current emissions profile. The majority of Vistavis's emissions during this period fall under **Scope 3 (45.85 tCO₂e)**, primarily driven by **business travel (43.15 tCO₂e)**. This highlights business travel as a key area for future focus in our carbon reduction strategies. Scope 2 emissions are significantly lower at **1.43 tCO₂e**, and there were no Scope 1 emissions recorded.

This initial dataset serves as a crucial benchmark for tracking future emissions and measuring the impact of our ongoing sustainability initiatives.

GHG emissions data (Submission Year 01st Jan 2024 – 31st Dec 2024)

Since this is our initial Carbon Reduction Plan our submission year and data is the same as Baseline year.

Zero Emissions Reasons: Organisational Activities Currently Out of Scope (and Inherent in 2024-2025 Data)

Category	1 Jan 2024 – 31 Dec 2024	Zero Emissions Reason
Scope 1 Direct Emissions	0.00	Our operations for this reporting period did not involve direct emissions from owned or controlled sources, such as a company-owned vehicle fleet.
Scope 3 Category 1 & 2	0.00	Emissions from purchased goods and services, as well as capital goods, were calculated as zero for this reporting period.
Scope 3 Category 4: Upstream T&D	0.00	There were no emissions associated with the upstream transmission and distribution of purchased goods and services.
Scope 3 Category 9: Downstream T&D	0.00	No emissions were generated from the downstream transmission and distribution of sold products.
Activities, operations, or assets located outside of the United Kingdom	N/A	Emissions from these are excluded as this report focuses solely on Vistavis's activities within the defined geographical boundaries of the United Kingdom. This includes any business travel outside the UK, supply chain emissions from international suppliers, and the use of our services by customers in other countries.
Emissions from franchises or subsidiaries	N/A	These are excluded because such entities have separate legal identities and operational control from Vistavis Limited.

Carbon Reduction Targets

Vistavis Limited is committed to a science-based approach to emissions reduction, ensuring our targets are both ambitious and achievable. We align our goals with the Science Based Targets initiative (SBTi) framework, which provides a clearly defined pathway for companies to reduce greenhouse gas emissions in line with the latest climate science.

Our current targets are as follows:

- **Interim Target:** Reduce Scope 1 and 2 emissions by 15% by 2030 from a 1st January 2024 – 31st December 2024 base year. This target is consistent with a **1.5°C pathway**, demonstrating our commitment to significant short-term reductions that contribute to limiting global warming.
- **Net Zero Target:** Achieve Net Zero emissions across all scopes (1, 2, and 3) by 2050. This long-term target signifies our dedication to a sustainable future and the full decarbonisation of our operations and value chain, in line with the most ambitious climate goals.

We will continuously review and update these targets annually to ensure they remain ambitious, aligned with the latest climate science, best practices, and our operational realities, allowing for flexibility to refine them as our capabilities and opportunities evolve.

Carbon Reduction Initiatives

To support our science-based targets and drive meaningful decarbonisation, Vistavis Limited is implementing a comprehensive set of carbon reduction initiatives. These efforts span internal operations, supply chain management, service delivery, and data transparency—each underpinned by measurable Key Performance Indicators (KPIs) and aligned to our 2030 and 2050 climate goals.

1. Monitoring and Reporting

Robust and transparent emissions tracking will underpin Vistavis Limited's carbon reduction journey. We will strengthen our data collection, reporting, and verification processes to align with global standards.

Key Actions:

- Deploy a carbon data platform across group entities by Q1 2026.
- Conduct annual GHG inventories using the GHG Protocol.
- Align disclosures with CDP and future Corporate Sustainability Reporting Directive (CSRD) requirements.

KPIs:

- 100% of Scope 1, 2, and material Scope 3 emissions reported annually from 2026.
- First external limited assurance of GHG data by 2027.
- Annual publication of progress towards near- and long-term targets.

These initiatives form the foundation of Vistavis Limited's decarbonisation strategy and are integral to our ambition to lead responsibly in the specialist commercial cleaning, flooring, and building services sector.

2. Employee Training and Engagement

We recognise that our workforce plays a vital role in achieving our sustainability objectives. Vistavis Limited will implement a targeted sustainability training programme tailored to our industry. This programme will build awareness around emissions sources (e.g., energy use in

operations, business travel, procurement practices) and encourage carbon-conscious decision-making.

Key Actions:

- Launch carbon literacy workshops for all employees by Q1 2026.
- Integrate sustainability modules into onboarding and manager training.
- Promote staff participation in green initiatives (e.g., remote working where applicable, digital-first practices, car sharing).

KPIs:

- 90% employee training completion by Q1 2026.
- Annual employee sustainability engagement score above 80%.

3. Supply Chain – Focus on Third-Party Suppliers

Given the significant contribution of upstream emissions (Scope 3), Vistavis Limited will work closely with third-party suppliers to improve environmental performance, particularly concerning cleaning products, equipment sourcing, logistics, and outsourced services.

Key Actions:

- Conduct a supplier emissions risk mapping by Q2 2026.
- Engage top 80% of suppliers (by spend/emissions) in carbon disclosure by 2026.
- Include SBTi-aligned emissions criteria in new supplier contracts from 2025 onward.

KPIs:

- 67% of Scope 3 supplier emissions covered by SBTi targets by 2030.
- 100% of new strategic supplier contracts include environmental clauses by 2026.

4. Sustainable Service Delivery and Waste Management

As a service provider, Vistavis Limited is committed to minimising the environmental impact of our operations by enhancing sustainable practices in service delivery and improving waste handling for materials used.

Key Actions:

- Expand the use of eco-friendly and low-impact cleaning products and materials by Q4 2025.
- Establish and promote a certified reuse and recycling network for operational waste across key UK markets.
- Educate clients and end-users on sustainable waste management practices related to our services.

KPIs:

- 95% of operational waste diverted from landfill by 2028.
- 100% of service delivery includes an option for sustainable waste disposal by 2027 where applicable contractually.
- Publish annual service delivery environmental impact data starting 2026.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard² and uses the appropriate Government emission conversion factors for greenhouse gas company reporting³.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁴.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Vistavis LIMITED:

Annex A: Alignment with ISO 14001:2015 Environmental Management System

This Annexe outlines how Vistavis Limited's Carbon Reduction Plan (CRP) aligns with the principles and requirements of ISO 14001:2015, the international standard for Environmental Management Systems (EMS). As Vistavis is certified to ISO 14001, this CRP forms an integral part of our broader environmental commitment and management framework.

The CRP demonstrates alignment with key clauses of ISO 14001 through its structured approach to identifying, managing, monitoring, and improving environmental performance related to greenhouse gas emissions.

ISO 14001:2015 Clause (Principle)	Description of Alignment within CRP	Reference within CRP
4.1 Understanding the organisation and its context	The CRP acknowledges the urgent need to address climate change and its associated risks, identifying this as a key external issue relevant to Vistavis's operations and commitment to Net Zero.	"Vistavis Limited...recognises the urgent need to address climate change and its associated risks." "This commitment aligns with the UK government's Net Zero target..."
4.2 Understanding the needs and expectations of interested parties	The CRP is developed in accordance with Procurement Policy Note (PPN) 06/21 and aims to promote transparency to stakeholders, indicating an understanding of their expectations regarding environmental performance.	"This plan has been developed in accordance with Procurement Policy Note (PPN) 06/21..." "Promote transparency: Communicate Vistavis's carbon reduction efforts to stakeholders, including customers, employees, suppliers, and the public."

ISO 14001:2015 Clause (Principle)	Description of Alignment within CRP	Reference within CRP
5.2 Environmental Policy	While not a standalone policy document, the CRP implicitly supports Vistavis's environmental policy by detailing commitments to minimising environmental impact and contributing to global warming limits.	"We are committed to minimising our environmental impact..." "All of this is aimed at contributing to global efforts to limit warming to 1.5 °C..."
6.1.1 Addressing risks and opportunities	The CRP is a direct response to the risks of climate change, outlining strategies (carbon reduction initiatives) to mitigate environmental impact and enhance operational efficiency.	"Vistavis acknowledges that its operations contribute to GHG emissions...We are committed to taking responsibility for these emissions and implementing effective measures to mitigate our impact." "By implementing the initiatives outlined in this CRP, Vistavis aims to minimise its carbon footprint, enhance its operational efficiency, and contribute to a more sustainable future."
6.1.2 Environmental aspects	The CRP explicitly identifies GHG emissions from key operational activities (energy consumption, business travel, employee commuting, supply chain activities) as significant environmental aspects.	"Vistavis acknowledges that its operations contribute to GHG emissions, primarily through energy consumption in our facilities, business travel, employee commuting, and the activities of our supply chain."
6.1.4 Planning action	The CRP details specific carbon reduction initiatives and key actions with measurable KPIs to achieve its targets, demonstrating clear planning for environmental performance improvement.	"Outline reduction initiatives: Identify and describe the concrete actions and projects that Vistavis will undertake to achieve its emission reduction targets." Section "Carbon Reduction Initiatives" (specifically Key Actions and KPIs within subsections 1, 2, 3, 4)
6.2 Environmental objectives and planning to achieve them	The CRP establishes clear interim and Net Zero targets for GHG reduction, which serve as specific environmental objectives, aligned with a 1.5°C pathway.	"Our current targets are as follows:" "Interim Target: Reduce Scope 1 and 2 emissions by 15% by 2030 from a 1st January 2024 – 31st December 2024 base year." "This target is consistent with a 1.5°C pathway..." "Net Zero Target: Achieve Net Zero emissions across all scopes (1, 2, and 3) by 2050."
7.2 Competence	The commitment to employee training and engagement in sustainability initiatives directly addresses the need for competence and awareness within the workforce.	"We recognise that our workforce plays a vital role in achieving our sustainability objectives." "Vistavis Limited will implement a targeted sustainability training programme tailored to our industry."

ISO 14001:2015 Clause (Principle)	Description of Alignment within CRP	Reference within CRP
		"This programme will build awareness around emissions sources... and encourage carbon-conscious decision-making." "KPIs: 90% employee training completion by Q1 2026."
7.4 Communication	The CRP itself serves as a key communication tool for Vistavis's carbon reduction efforts to internal and external stakeholders.	"Promote transparency: Communicate Vistavis's carbon reduction efforts to stakeholders, including customers, employees, suppliers, and the public."
9.1.1 Monitoring, measurement, analysis and evaluation	The plan outlines robust monitoring and reporting processes, including annual GHG inventories and the use of a carbon data platform, ensuring systematic measurement and analysis of emissions.	"Robust and transparent emissions tracking will underpin Vistavis Limited's carbon reduction journey." "We will strengthen our data collection, reporting, and verification processes to align with global standards." "Conduct annual GHG inventories using the GHG Protocol." "Deploy a carbon data platform across group entities by Q1 2026." Section "Analysis of Emissions" (specifically the tables and summaries of Scope 1, 2, and 3 emissions)
9.3 Management review	The commitment to annual review and updates of the CRP demonstrates a process for ongoing management review, allowing for adaptation and improvement of the strategy.	"Our plan is reviewed regularly to assess the evolving opportunities to meet our targets." "This plan will be reviewed and updated annually..."
10.3 Continual improvement	The overall purpose of the CRP includes driving continuous improvement in carbon reduction performance, with a framework for ongoing monitoring and review.	"Drive continuous improvement: Establish a framework for ongoing monitoring, reporting, and review of our carbon reduction performance, enabling us to adapt and improve our strategy over time." "This initial dataset serves as a crucial benchmark for tracking future emissions and measuring the impact of our ongoing sustainability initiatives."

Annex B: Alignment with PPN 006/25 (Carbon Reduction Plan)

PPN 06/21 Requirement	Description of Alignment within CRP	Reference within CRP
Commitment to Net Zero by 2050	The CRP explicitly states Vistavis's commitment to achieving Net Zero emissions across all scopes by 2050, aligning with the UK government's target.	"This commitment aligns with the UK government's Net Zero target, which mandates a significant reduction in greenhouse gas (GHG) emissions by 2050." "Net Zero Target: Achieve Net Zero emissions across all scopes (1, 2, and 3) by 2050."
Baseline Emissions Footprint	The CRP clearly establishes a baseline period (1st Jan 2024 to 31st Dec 2024) and quantifies emissions for Scope 1, 2, and 3.	"Baseline Period: 1st Jan 2024 to 31st Dec 2024" Table: "Scopes and categories" showing Baseline Tons CO2e for Scope 1, 2, and 3 categories.
Reporting Period Emissions	The CRP provides a comprehensive overview of emissions for the reporting period (1st Jan 2024 to 31st Dec 2024) across all relevant scopes and categories.	"Reporting Period: 1st Jan 2024 to 31st Dec 2024" Table: "Scopes and categories" showing emissions for the reporting period. "This section provides a comprehensive overview of Vistavis Limited's greenhouse gas (GHG) emissions for the reporting period"
Current Carbon Reduction Targets	The CRP defines clear interim and Net Zero targets, consistent with a 1.5°C pathway, demonstrating ambitious reduction goals.	"Our current targets are as follows:" "Interim Target: Reduce Scope 1 and 2 emissions by 15% by 2030 from a 1st January 2024 – 31st December 2024 base year." "This target is consistent with a 1.5°C pathway..." "Net Zero Target: Achieve Net Zero emissions across all scopes (1, 2, and 3) by 2050."
Carbon Reduction Initiatives	The CRP outlines specific initiatives across various areas (Monitoring, Employee Engagement, Supply Chain, Sustainable Service Delivery) with key actions and KPIs to achieve reduction targets.	Section "Carbon Reduction Initiatives" outlining specific actions and KPIs for Monitoring and Reporting, Employee Training and Engagement, Supply Chain – Focus on Third-Party Suppliers, and Sustainable Service Delivery and Waste Management.
Declaration and Sign Off	The CRP includes a formal declaration that it has been completed in accordance with PPN 06/21 and associated guidance, and is signed off by the board of directors.	"This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans." "This Carbon Reduction Plan has been

PPN 06/21 Requirement	Description of Alignment within CRP	Reference within CRP
		reviewed and signed off by the board of directors (or equivalent management body)." "This Carbon Reduction Plan has been reviewed and signed off by the board of directors"
Publication Date	The publication date of the CRP is clearly stated.	"Publication Date: 30/07/2025"
